

ninthvector & nexternal

ecommerce homepage

Ninthvector offers an affordable, customized website designed specifically for Nexternal clients; your new site is quickly set up and easily integrated with your shopping cart platform. You dictate the look and feel, including colors, fonts, images, navigation, and feature placement, thereby creating the website that best represents your brand.

Your new site will be completely integrated with your product catalog including drop down menus linked to your products and categories as well as an integrated product search field, allowing customers to quickly search with product and category keywords. Furthermore, with an additional page for your Nexternal-managed mailing list sign-up form, your customers can easily subscribe to news and promotions.

And perhaps most importantly, you can feature products on your home page that are managed directly through your Nexternal admin interface. This feature gives you complete control over which products receive prime placement on your home page.

Customize your website

- Stylized, vertical drop down menu, with horizontal sub-items (sub-items are displayed when the user hovers over the selected menu item)
- Breadcrumb menu - for additional content (non-product, non-category) pages, displays to user path to their current page. Allows for easy return navigation.
- Mailing list sign up form - integrated with Nexternal
- Featured products - display featured products on specified pages, including image, price, title, and short description.
- Social networking icons (facebook, Twitter), addThis tool bar, copyright information
- Custom designed buttons for the product catalog including: Add to Cart, Checkout, Add Products, Select Options, Edit, and Add

Special Package Pricing for Nexternal Clients

\$1500

Package includes two (2) page layouts: homepage layout and mailing list signup form as well as all elements outlined above. Additional page layouts are subject to additional fees based on our hourly rate of \$85.

summary

- customized website integrated with Nexternal
